Zhu, Jiangtao, 244

- Acrophialophora nainiana*, low-molecular-weight xylanase produced by, 18
- Adenylate cyclase-hemolysin*, found in outer membrane vesicles of *Bordetella pertussis*, 273
- Aeromonas hydrophila*, phosphate uptake by, in presence of nitrate and oxygen, 300
- Agaricus bisporus*, production, purification, and properties of endo-1,3- $\beta$ -glucanase from, 190
- Agaricus bisporus* fruit bodies, chemical analysis of lamella walls of, 364
- Agrobacterium radiobacter*, polyphosphate-accumulating and denitrifying bacteria in sequencing reactors, 9
- Agrobacterium tumefaciens*, phosphate uptake by, in presence of nitrate and oxygen, 300
- Agrobacterium tumefaciens* B, polyphosphate-accumulating and denitrifying bacteria in sequencing reactors, 9
- Alkaline phosphatase gene (phoA)*, expressed in *E. coli*, effect of integration host factor on, 80
- $\alpha$ -galactosidase, from *Bifidobacterium adolescentis*, production, purification, and characterization of, 101
- Amino acid biosynthesis*, in *Buchnera aphidicola*, detection of mRNA from genes encoding enzymes of, 135
- 4-Amino-4-deoxy-arabinose*, in lipopolysaccharide of *P. aeruginosa* Z61, 228
- Amplified ribosomal DNA restriction analysis (ARDRA)*, compared with ERIC-PCR for DNA fingerprinting of mixed bacterial strains and BIOLOG gram-negative substrate communities, 217
- Anaerobic bacteria*, transient production of formate during chemolithotrophic growth of, 285
- Antarctic psychotrophic bacterium*, effect of rRNA degradation at supraoptimal growth temperatures on, 143
- Apoptosis*, of chicken lymphocytes, caused by outer-membrane proteins from *Campylobacter jejuni*, 244
- Aquaspirillum dispar*  
phosphate uptake by, in presence of nitrate and oxygen, 300  
polyphosphate-accumulating and denitrifying bacteria in sequencing reactors, 9
- Arthrobacter photogonimus*, regulation of *lipA* gene expression by cell surface proteins in, 92
- Autonomously replicating sequence (ARS)*, of *Saccharomyces exiguus* Yp74L-3, 122
- Bacillus cereus*, effect on behavior of *Pythium torulosum* zoospores during interaction with tobacco roots, 199
- Bacillus cereus* ATCC 10987, characterization of *mbl* determinant and cloning of *spoIIID* gene from, 224
- Bacillus megaterium*, effect of different temperatures on protein degradation of, 86
- Bacillus polymyxa*, introduction and expression of *cryIAC* gene of *Bacillus thuringiensis* in, 163
- Bacillus thuringiensis*, *cryIAC* gene of introduced into *Bacillus polymyxa*, 163
- Bacteriophage FIZ15*, lysogenic conversion in *P. aeruginosa* PAO1 caused by, 239
- Bifidobacterium adolescentis* DSM 20083,  $\alpha$ -galactosidase of, 101
- BIOLOG* gram-negative substrate communities, ERIC-PCR used for fingerprinting of, 217
- Bordetella pertussis*, release of outer membrane vesicles from, 273
- Brevibacterium linens* OC2, identification and characterization of *impA* gene encoding efflux protein from, 320
- Buchnera*, plasmid-associated *trpEG* gene of probably originated from chromosomal location between *hslU* and *fpr*, 309
- Buchnera aphidicola*, mRNA from genes encoding enzymes of amino acid biosynthesis detected in, 135
- Burkholderia cepacia* Pc224c, purification and characterization of phospholipase C from, 233
- $Ca^{2+}$ , role in protein degradation of *Bacillus megaterium*, 86
- Cajanus cajan*, chemotaxis of *Rhizobium* sp. S2 toward root exudate of, 205
- Campylobacter jejuni*, apoptotic effect on chicken lymphocytes caused by outer membrane proteins from, 244
- Candidatus Liberobacter*, RAPD isolates DNA from, 176
- Carboxy-DCFDA* fluorescent marker, vacuolar system of *Schizophyllum commune* identified by, 295
- Catabolite (de)repression genes*, effect of disruption of on cell cycle behavior of *S. cerevisiae*, 57
- Cell lysis treatments*, role in protocol for DNA extraction from activated sludges, 315
- Cell shape mutations*, of *Salmonella typhimurium alaS* mutant strain, lethality on solid medium, 137
- Cell surface proteins*, *lipA* gene expression in *Arthrobacter photogonimus* regulated by, 92
- Chemotaxis*, of *Rhizobium* sp. S2 toward *Cajanus cajan* root exudate, 205
- Chloramphenicol*, cold adaptation of *Vibrio vulnificus* inhibited by, 168
- Chlorella*  
human growth hormone expressed by, 335  
xylose used for growth by, 360
- Cladosporium species*, dominant species in outdoor air fungal profiles, 33
- Clostridium butyricum species*, distribution of rubredoxin gene among strains of, 264
- Clostridium difficile* M90 strain, detection and transcription of *tcdA* and *tcdB* in, 324
- Clostridium perfringens* enterotoxin (CPE), cytokine response induced by, 96
- Cold adaptive response*, of *Vibrio vulnificus* prior to freezing, 168
- Compost bacteria*, decomposition of unsaturated fatty acids by, 250
- Copper metallothionein CUP1*, from *Saccharomyces cerevisiae* expressed in *Synechococcus* R2-PIM8(*smtA*), 155
- Corynebacterium diphtheriae*, cell surface hydrophobicity of evaluated by different methods, 37
- CryIAC gene*, of *Bacillus thuringiensis*, introduction and expression of in *Bacillus polymyxa*, 163
- Cryptic plasmids*, isolated from *Selenomonas ruminantium*, sequence analysis of, 107
- Culture media*  
effect on composition of outer membrane protein of *Vibrio damsela*, 1  
effect on outer membrane protein profiles of *Serratia liquefaciens*, 71
- Cytokine response*, induced by *Clostridium perfringens* enterotoxin, 96
- Decolorization*, of industrial dyes by laccases from *Trametes hispida*, 27
- Denitrification*, *Aquaspirillum dispar* removes phosphate by, 300
- Denitrifying bacteria*, isolated from sequencing batch reactors, 9
- Dental unit water*, comparison of methods to enumerate bacteria in, 132
- DNA extraction*, from activated sludges, development of protocols for, 315
- DNA fingerprinting*, comparison of ERIC-PCR, RAPD-PCR, and ARDRA methods for, 217
- DNA polymerase I gene (polA)*, of *Rhizobium leguminosarum*, compared with that of other family A DNA polymerases, 355

- Endo-1,3-β-glucanase*, from *Agaricus bisporus*, production, purification, and properties of, 190
- Enterobacterial Repetitive Intergenic Consensus Sequence - PCR (ERIC-PCR)*, fingerprinting mixed bacterial strains and BIOLOG gram-negative substrate communities by, 217
- Enterohemorrhagic E. coli O157:H7* isolates, changes in PFGE patterns in associated with loss of Shiga toxin genes, 48
- erg19-34* mutation, of *ERG19* gene *S. cerevisiae* impairs dimerization, 290
- Escherichia coli*  
DNA polymerase I gene compared with that of *Rhizobium leguminosarum*, 355  
identification of transcription initiation sites of isolated promoters active in, 210  
integration host factor affects expression of *pst* and *phoA* in, 80  
mRNA structure of *secA* of, 113
- Floc dispersion methods*, role in protocol for DNA extraction from activated sludges, 315
- Flow cytometry*, effect of disruption of catabolite (de)repression genes on yeast cell cycle measured by, 57
- Formate*, anaerobic bacteria grow on and produce during chemolithotrophic growth, 285
- Glossina morsitans centralis*, effect of tsetse fly virus on male accessory reproductive gland in, 349
- Group B streptococci*, identification of high virulence clone of, 126
- H<sub>2</sub>/CO<sub>2</sub>*, formate production by anaerobic bacteria while growing chemolithotrophically using, 285
- H<sub>2</sub>O<sub>2</sub> production*, by vaginal *Lactobacillus crispatus* F117, 279
- Heat stress protein (hsp) genes*, for Hsp in lactic acid bacteria, distribution of, 43
- Hemagglutination*, of sucrose fermenting and nonfermenting *Corynebacterium diphtheriae*, 37
- HPC samplers*, enumerating planktonic bacteria in dental unit treatment water using, 132
- Huanglongbing disease*, isolation of DNA from *Candidatus Liberobacter* associated with, 176
- Human growth hormone*, expressed by eukaryotic alga *Chlorella*, 335
- Hydrophobicity*, of sucrose fermenting and nonfermenting *Corynebacterium diphtheriae*, 37
- Indoor air quality*, *Penicillium* species role in, 33
- Industrial dye*, decolorized by laccases from white-rot fungi, 27
- Inorganic phosphate transport system genes (pst)*, expressed in *E. coli*, effect of integration host factor on, 80
- Integration host factor*, expression of *pst* and *phoA* in *E. coli* affected by, 80
- Interferon γ*, induced by macrophages incubated in CPE, 96
- Interleukin-1*, induced by macrophages incubated in CPE, 96
- Interleukin-6*, induced by macrophages incubated in CPE, 96
- Intracellular serine proteinase 1 (ISP1)*, role in protein degradation of *Bacillus megaterium*, 86
- Kanostamine*, purified from *Bacillus cereus* UW85, effect on *Pythium torulosum* interaction with tobacco roots, 199
- Klebsiella oxytoca*, phosphate uptake by, in presence of nitrate and oxygen, 300
- Lactic acid bacteria*, plasmid borne *hsp* gene distribution in, 43
- Lactobacillus crispatus* F117, vaginal H<sub>2</sub>O<sub>2</sub> generation by, 279
- Lamella walls*, of *Agaricus bisporus* fruit bodies, chemical structure of, 364
- Ligninolytic fungi*, industrial dye decolorization by laccases from, 27
- lipA gene expression*, in *Arthrobacter photoglossus*, regulated by cell surface proteins, 92
- Lipopolysaccharide*  
of *P. aeruginosa* Z61, presence of 4-amino-4-deoxy-arabinose in, 228  
of *Vibrio anguillarum*, composition and structure of, 183
- Low frequency ultrasound*, effect on *Staphylococcus epidermidis*, 194
- Lysogenic conversion*, of *P. aeruginosa* PAO1 caused by bacteriophage FIZ15, 239
- Macrolide antibiotics*, effect of closing 11,12-hydroxyl groups and carbonate substitution in on effectiveness, 342
- Macrophage activity*, effect of *Clostridium perfringens* enterotoxin on, 96
- mbl determinant*, of *Bacillus cereus* ATCC 10987, sequence of, 224
- MDY-64 fluorescent marker*, vacuolar system of *Schizophyllum commune* identified by, 295
- Mesorhizobium loti*, changes in composition and response to pH, 329
- Mevalonate diphosphate decarboxylase*, encoded by *ERG19* gene of *S. cerevisiae*, forms homodimers in vivo, 290
- Mexico*, group B streptococci invasive neonatal disease in, 126
- O-Serogroups*, in *Vibrio anguillarum* added to serotyping scheme, 183
- Outer membrane proteins*  
from *Campylobacter jejuni*, apoptotic effect on chicken lymphocytes caused by, 244  
of *Serratia liquefaciens*, characterization of, 71
- Outer membrane vesicles*, from *Bordetella pertussis*, production of and presence of antigens in, 273
- Pasteurella multocida* isolates, secretion of proteases from, 64
- Pasteurella multocida* serotype A strain, polysaccharide-deficient variants derived from, 268
- Penicillium species*, dominant species in indoor air of sick building, 33
- pH*, acid, effect on cellular envelopes in *Mesorhizobium loti*, 329
- L-Phenylalanine*, nitrogen source for *Rhodobacter capsulatus*, 51
- Phosphate accumulating bacteria*, isolated from sequencing batch reactors, 9
- Phospholipase C*, nonhemolytic, from *Burkholderia cepacia*, purification and characterization of, 233
- Plp-40 lipoprotein*, role in serotype A extracellular polysaccharide production by *Pasteurella multocida*, 268
- Poly(β-hydroxyalkanoate)*, synthesized from triacylglycerols by *Pseudomonas saccharophila*, 151
- Polymycin B*, presence of 4-amino-4-deoxy-arabinose in lipopolysaccharide of *P. aeruginosa* Z61 does not correlate with antimicrobial resistance to, 228
- Polypolyphosphate accumulating bacteria isolates*, in presence of nitrate and oxygen, kinetic behavior of, 300
- Porins*  
isolated from outer membrane of *Serratia liquefaciens*, 71  
outer membrane proteins of *Vibrio damsela*, 1
- Prevotella loeschii* adhesion gene (*plaA*), translational hop junction and 5' transcriptional start site of, 22
- Probiotic use*, vaginal H<sub>2</sub>O<sub>2</sub>-generating *Lactobacillus crispatus* F117 selected from, 279
- Proteases*, secreted from *Pasteurella multocida* isolates, 64
- Protein degradation*, in nongrowing *Bacillus megaterium* under heat stress, 86
- Pseudomonas aeruginosa* PAO1, FIZ15 bacteriophage causes lysogenic conversion in, 239
- Pseudomonas aeruginosa* Z61, occurrence of 4-amino-4-deoxy-arabinose in lipopolysaccharide of, 228
- Pseudomonas saccharophila*, medium-chain-length poly(β-hydroxyalkanoate) synthesis from triacylglycerols by, 151

- Pseudomonas syringae*, transcriptional activity in, at supraoptimal temperature for growth, 143
- Pulp bleaching*, xylanase from *Acrophialophora nainiana* used for, 18
- Pulsed field gel electrophoresis pattern*, effect of loss of Shiga toxin gene from *E. coli* O157:H7 isolates on, 48
- Pythium torulosum* zoospores, behavior during interaction with tobacco roots, effect of *Bacillus cereus* on, 199
- R2A agar*, enumerating planktonic bacteria in dental unit treatment water using, 132
- Random amplified polymorphic DNA analysis (RAPD)*  
identification of transcription initiation sites of isolated promoters active in, 210  
isolation of DNA from *Candidatus* Liberobacter associated with huanglong-bing disease using, 176
- Rapid amplification of cDNA ends (RACE)*, transcriptional start site of *plaA* mRNA determined by, 22
- Rhizobium leguminosarum*, structure of DNA polymerase I gene (*polA*) of, 355
- Rhizobium* sp. S2, chemotaxis of toward *Cajanus cajan* root exudate, 205
- Rhodobacter capsulatus*, metabolism of L-phenylalanine and L-tyrosine by, 51
- Ribosomal RNA*, effect of degradation of on growth of Antarctic psychotropic bacterium, 143
- Rickettsia prowazekii*, DNA polymerase I gene compared with that of *Rhizobium leguminosarum*, 355
- RNAse structure analysis*, of geneX-*secA* mRNA intergenic region of *E. coli*, 113
- Rubredoxin gene*, distribution among strains of *Clostridium butyricum* species, 264
- Saccharomyces cerevisiae*  
autonomously replicating sequence of, compared with *S. exiguus*, 122  
effect of disruption of catabolite (de)repression genes on cells cycle behavior of, 57  
in vivo homodimer formation by mevalonate diphosphate decarboxylase of, 290
- Saccharomyces exiguus* Yp74L-3, autonomously replicating sequence of, 122
- Saccharomyces species*, sequences of internal transcribed spacer regions of, 61
- Salmonella typhimurium alaS* mutant strain, conditional lethality of cell shape mutations of, 137
- Schizophyllum commune*, fluorescent markers identify vacuolar system of, 295
- secA* gene of *E. coli*, RNA structural conformations mediate regulation of, 113
- Selenomonas ruminantium* S20, sequence analysis of cryptic plasmids from, 107
- Sequence analysis*, of cryptic plasmids isolated from *Selenomonas ruminantium* S20, 107
- Sequencing batch reactors*, phosphate-accumulating and denitrifying bacteria isolated from, 9
- Serotyping scheme*, for *Vibrio anguillarum*, 183
- Serratia liquefaciens*, porins isolated from outer membrane of, 71
- Shiga toxin genes*, changes in PFGE patterns of *E. coli* O157:H7 with loss of, 48
- Sick building syndrome*, continually measured fungal profiles in, 33
- SNF4* gene, effect of disruption of, on cell cycle behavior of *S. cerevisiae*, 57
- SO34 adhesin protein*, N-terminal peptide sequence of, 22
- Southern hybridization analysis*, distribution of plasmid-borne *hsp* genes in lactic acid bacteria determined by, 43
- Spacer regions*, of *Saccharomyces* species, sequence analysis of, 61
- spoIIID* gene, of *Bacillus cereus*, *mbf* transcribed from promoter located in, 224
- Staphylococcus aureus* cells, 11,12 carbonate macrolide antibiotics inhibit growth rate, cell viability, protein synthesis, and 50S ribosomal subunit formation in, 342
- Staphylococcus epidermidis*, effects of low-frequency ultrasound on, 194
- Streptococcus thermophilus*, distribution of plasmid-borne heat stress protein genes in, 43
- Synechococcus PCC7942*, identification of transcription initiation sites of isolated promoters active in, 210
- Synechococcus PCC7942 promoter*, tRNA<sup>pro</sup> gene functions as, 210
- Synechococcus R2-PIM8(smtA)*, copper metallothionein CUP1 from *Saccharomyces cerevisiae* expressed in, 155
- Temperature*, effect on growth of high virulence clone of group B streptococci, 126
- Thermus aquaticus*, DNA polymerase I gene compared with that of *Rhizobium leguminosarum*, 355
- tmpA* gene, encoding efflux protein of transporter family III, cloned from *Brevibacterium linens* OC2, 320
- Tobacco roots*, effect of *Bacillus cereus* cultures, culture filtrates, and antibiotics on behavior of *Pythium torulosum* zoospores interacting with, 199
- Toxin DNA*, in nontoxicogenic strain of *Clostridium difficile*, detection and transcription of, 324
- Trametes hispida*, decolorization activity by laccases from, 27
- Triacylglycerols*, poly( $\beta$ -hydroxyalkanoate) synthesized by *Pseudomonas saccharophila* from, 151
- trpEG* gene, of *Buchnera*, originated from chromosomal location between *hslU* and *fpr*, 309
- Tsetse fly DNA virus*, effect on accessory reproductive gland of *Glossina morsitans centralis*, 349
- Tumor necrosis factor  $\alpha$* , induced by macrophages incubated in CPE, 96
- L-Tyrosine*, nitrogen source for *Rhodobacter capsulatus*, 51
- Unsaturated fatty acids, bioconversion of, by compost bacteria, 250
- Vacuolar system*, of *Schizophyllum commune*, identified by fluorescent markers, 295
- Vibrio anguillarum*, extended serotyping scheme for, 183
- Vibrio damsela*, outer membrane porins of, 1
- Vibrio vulnificus*, adaptive response to cold temperatures in, 168
- Xylanase*, from *Acrophialophora nainiana*, purification and characterization of, 18
- Xylose*, used by *Chlorella* for growth, 360
- Yersinia enterocolitica* serotype O9, mice infected by oral and parenteral routes with, 257
- Zwittermixin A*, purified from *Bacillus cereus* UW85, effect on *Pythium torulosum* interaction with tobacco roots, 199
